TECHNICAL DATA SHEET

Max FH100 LQ

Fertilizer Group 2 | Registration Number K11647 Act 36 of 1947

This product is made from fresh fish. It is a 100% natural organic product which is fully biodegradable. No artificial, man made fertilisers are added. All components can be used by plants and/or soil organisms.

COMPOSITION / ANALYSIS:

Nitrogen	2.2 %
Phosphorus	2.96 %
Potassium	0.19 %
Calcium	0.045 %
Magnesium	0.03 %
Sodium	1691 mg/kg
Iron	17.624 mg/kg
Copper	<0.002 mg/kg
Zinc	11.897 mg/kg
Manganese	0.775 mg/kg
Boron	0.121 mg/kg
pH	3.1
Specific Gravity @ 20°C	1.075 - 1.125 g/L
Appearance	Light to medium grey-brown liquid

BENEFITS

- Supplies food to soil microbes.
- Supplies a broad diversity of nutrients to plant roots.
- As opposed to Fish Emulsion, Fish Hydrolysate is made through a cold process which preserves all the precious enzymes and natural oils found in fish from the cold waters of the South Atlantic Ocean.
- Using FH100 with microbial products or in compost teas will greatly enhance the efficiency of these organisms.
- Mix together with humic and fulvic acid in a blend, this is a potent way of stimulating soil microbes and getting the nutrients cycled in the rhizosphere of plants.
- Improves soil health and fertility.
- Improves yields with less pesticides and synthetic fertilizers.

PACKAGING

25L

APPLICATION

Fertigation: 5 - 20L/ha
Liquid application with planter: 5 - 10L/ha
Foliar Spray: 3 - 6L/ha
Seed Coating: 1 - 5ml/1Kg seed

INCOMPATIBILITY

None.
